PUBLICATIONS – EMDR 2014

(Principales publications)

McGuire TM, Lee CW, Drummond PD

Wheeler K.
Inadequate treatment and research for PTSD at the VA.

Croes CF, van Grunsven R, Staring AB, van den Berg DP, de Jongh A, van der Gaag M.
Imagery in psychosis: EMDR as a new intervention in the treatment of delusions and auditory hallucinations.
Tijdschr Psychiatr. 2014;56(9):568-76. Dutch

Perez-Dandieu B, Tapia G.
Treating Trauma in Addiction with EMDR: A Pilot Study.

Facilitating access to emotions: neural signature of EMDR stimulation.
Herkt D, Tumani V, Grün G, Kammer T, Hofmann A, Abler B.
Neurophysiological correlates of eye movement desensitization and reprocessing sessions: preliminary evidence for traumatic memories integration.

How eye movements in EMDR work: changes in memory vividness and emotionality.
Leer A, Engelhard IM, van den Hout MA.
Trauma-focused cognitive behavioral therapy or eye movement desensitization and reprocessing: what works in children with posttraumatic stress symptoms? A randomized controlled trial.
Diehle J, Opmeer BC, Boer F, Mannarino AP, Lindauer RJ.

Eye movement desensitization and reprocessing therapy in subsyndromal bipolar patients with a history of traumatic events: a randomized, controlled pilot-study.

Cottraux J, Lecaignard F, Yao SN, De Mey-Guillard C, Haour F, Delpuech C, Servan-Schreiber D.

Mental health interventions for children exposed to disasters and terrorism.
Pfefferbaum B, Newman E, Nelson SD.

Effects of eye movement desensitization and reprocessing (EMDR) treatment in chronic pain patients: a systematic review.

Efficacy of a trauma-focused treatment approach for dental phobia: a randomized clinical trial.

The use of meta-analytic software to derive hypotheses for EMDR.

What does the data say about the importance of eye movement in EMDR?

Stress management techniques in the prison setting.

Treating PTSD in patients with psychosis: a within-group controlled feasibility study examining the efficacy and safety of evidence-based PE and EMDR protocols.
